Methodology

Latino Decisions interviewed a total of 2,200 Latino registered voters between April 3 - April 13, 2016.

Interviews were conducted in English or Spanish, according to the respondent's choice. Surveys were completed using a blended sample that included online surveys, and live telephone interviews on landlines and cell phones.

For three individual states (Colorado, Florida and Nevada), a minimum of 400 interviews were completed to provide state-specific reliable estimates, and carry an overall margin of error of 4.9%.

For the remaining 37 states and the District of Columbia an additional national sample was completed, and then combined with the three state samples, and weighted for an overall combined nationally proportionate sample. The national sample carries a margin of error of +/-2.1 percentage points.
