Methodology. On behalf of NALEO Educational Fund, Latino Decisions interviewed 528 Latino registered voters in California between August 28 – October 15, 2018. The survey carries a margin of error of 4.4%. Respondents were randomly selected from Latino Decisions partner web panels and confirmed to be registered to vote. The survey was self-administered and available in English or Spanish at the discretion of the respondent. Data were compared to the best-known estimates of the U.S. Census Current Population Survey (CPS) for demographic profile of Latino registered voters in California, and weights were applied to bring the data into direct balance with Census estimates.
