

USC / Los Angeles Times / Latino Decisions oversample of Latino voters

As part of the USC / *Los Angeles Times* poll of California registered voters, Latino Decisions conducted an oversample of Latino registered voters in California. A total of 400 Latino registered voters were interviewed by Latino Decisions, by telephone from September 16 – 22, 2010. Name and phone number samples were provided by Survey Sampling International (SSI) which included about 12% cell-phone only Latino households. Respondents were first screened by Spanish surname based on the name listed on the publically available list of registered voters in California. Respondents then confirmed if they were Latino and currently registered to vote in California, and only self-identified Latino registered voters continued with the survey. The survey was available in English or Spanish, at the preference of the respondent, and all interviewers were fully bilingual. Overall, 40% of the Latino oversample interviews were conducted in Spanish, and 60% in English. The 400 completed interviews carry a margin of error of +/- 4.9%. Greenberg Quinlan Rosner Research conducted the non-Latino portion of the USC / *Los Angeles Times* poll, and Latino Decisions conducted only the Latino oversample.

The Latino oversample methodology was overseen by Political Scientists, Dr. Matt A. Barreto and Dr. Gary M. Segura of Latino Decisions.

In the following pages we report the frequency distribution of all responses by Latino registered voters, Latino likely voters, foreign-born voters, and native-born Latino voters.

Total = All 400 Latino registered voters

Likely = 209 likely Latino voters

Foreign = 184 Foreign-born, naturalized citizen Latino registered voters

Native = 216 U.S. born Latino registered voters

¹ Likely voters are defined as registered voters that meet certain conditions based on previous vote history as determined from a voter file, likelihood of voting in 2010, and enthusiasm in the election. This includes respondents who voted in both the previous two general elections who indicate they are "almost certain" or "probably" will vote in 2010 and those who have registered since the 2008 election due to ineligibility who are "almost certain," all of whom must respond as a 5 or higher on our 0-10 enthusiasm scale.

Q.8 Please rate your level of enthusiasm about voting in this year's election in California on a scale from zero to ten, where zero means you're not at all enthusiastic about voting this year and ten means you're extremely enthusiastic about voting this year. You can use any number from zero to ten, the higher the number the more enthusiastic you are about voting this year.
