Q18. Just last week President Trump stated that the U.S. will impose a 5% tariff on all products coming from Mexico, increasing by 5% each month to a maximum of 25% tariff on all products – until Mexico is able to control immigrants coming from Central America and block them from entering the United States. Do you think this new tariff is a good idea or a bad idea as a way to reduce Central American migrants?

Poll Methodology

On behalf of Univision Communications Inc., Latino Decisions and North Star Opinion collaborated on a national poll of Latino eligible voters. The poll was overseen by Univision polling director Dr. Sergio Garcia-Rios. Overall 1,007 Latino citizen adults were interviewed across all fifty states from a combination of landline, cell phone, and online completion modes. All voters were randomly selected and given the opportunity to complete the interview in English or Spanish, at their discretion. Randomized stratified quota sampling was employed to ensure the appropriate balance of Latinos across state, gender, age, education, and nativity. Post-stratification weights were applied to bring the sample into alignment with the Census CPS estimates of Latino citizen adults nationwide. Overall 38% of interviews were in Spanish and 62% in English. The final survey contains an overall design error of +/- 3.1%. For registered voters the possible error is +/- 3.4% and for likely voters +/- 4.2%. The survey was in the field June 11-17, 2019.
