Methodology

On behalf of Univision Communications Inc., Latino Decisions and North Star Opinion collaborated on a national poll of Latino registered voters following the Houston Democratic debate. The poll was overseen by Univision polling director Dr. Sergio Garcia-Rios. Overall 408 Latino registered voters were interviewed across all fifty states from a combination of landline, cell phone, and online completion modes. All voters were randomly selected from the voter file and given the opportunity to complete the interview in English or Spanish, at their discretion. Randomized stratified quota sampling was employed to ensure the appropriate balance of Latinos across state, gender, age, education, and nativity. Post-stratification weights were applied to bring the sample into alignment with the Census CPS estimates of Latino eligible voters nationwide. Overall 21% of interviews were in Spanish and 79% in English. The final survey contains an overall design error of +/- 4.8%. The survey was in the field Sept 13-16, 2019.
