Hard Hits to Colorado's Latino Parents with Children in School

11

- 74% of Latino parents in Colorado worry their kids are falling behind because they've missed so much school.
- 42% attempted to act as the home-school teacher to their children as schools went online.
- 19% do not have enough computer equipment to accommodate everyone in the home who is now working and going to school online.
- 27% online school has been difficult because of technical problems.

Hard Hits to Latino Small-Business Owners and Self-employed

12

- One in five Latino entrepreneurs in Colorado (20%) shutdown altogether, or lost significant revenue due to temporary closing.
- Among them, 34% had trouble getting a loan under the initial stimulus bill.
- Among those working and schooling children at home
 - 88% received no support to cover costs for equipment, wifi or data plans needed to complete work and school assignments.

TRUST IN A TIME OF CRISIS

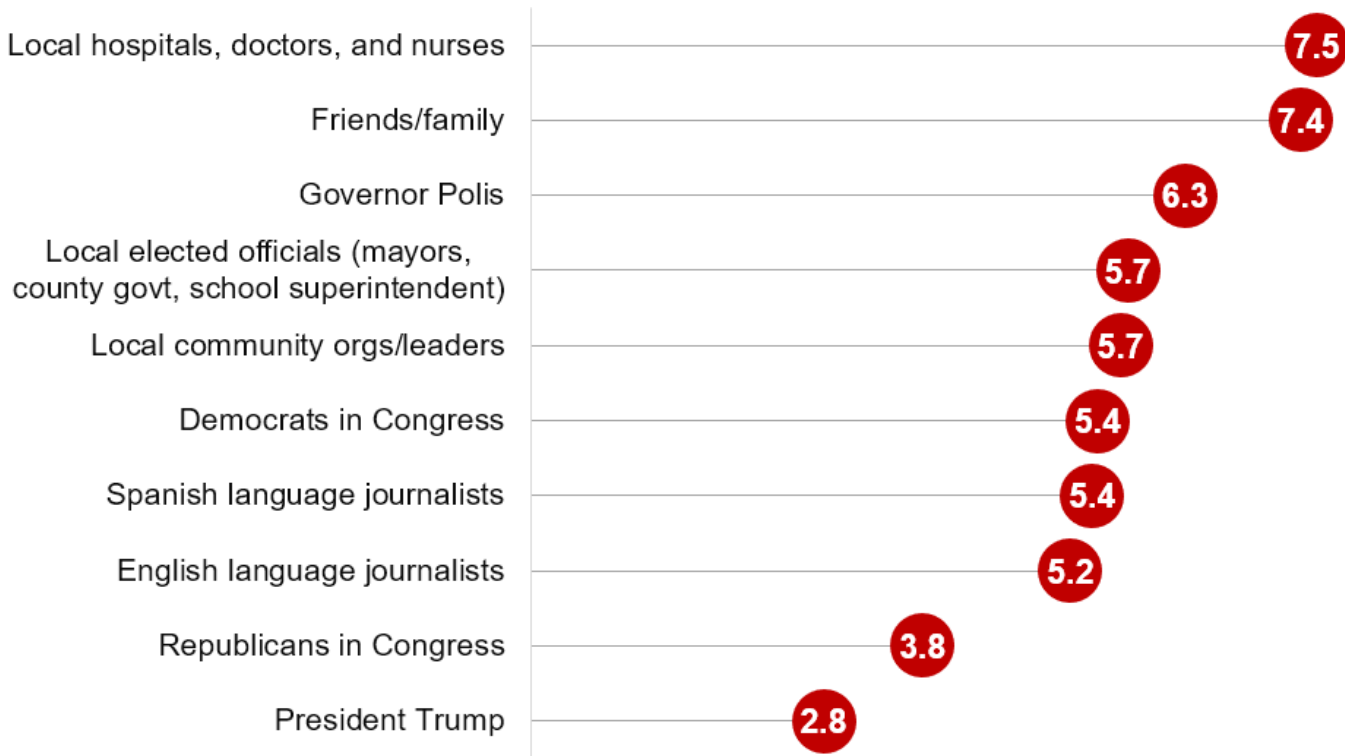

Most Trusted: Local Medical Experts, Least Trusted: Trump

(On a scale of 0 to 10, how much do you trust each of the following to provide accurate information and helpful advice related to the coronavirus outbreak? Mean values illustrated)

Latinos in Colorado are most trusting of medical experts and their friends and family.

Governor Polis, and local leaders and organizations are relied upon more than members of Congress or the President.

Trump is the least trusted source. On a scale of 0 to 10, 44% rated him zero. Mean trust in Trump is lowest of all sources tested, at 2.8

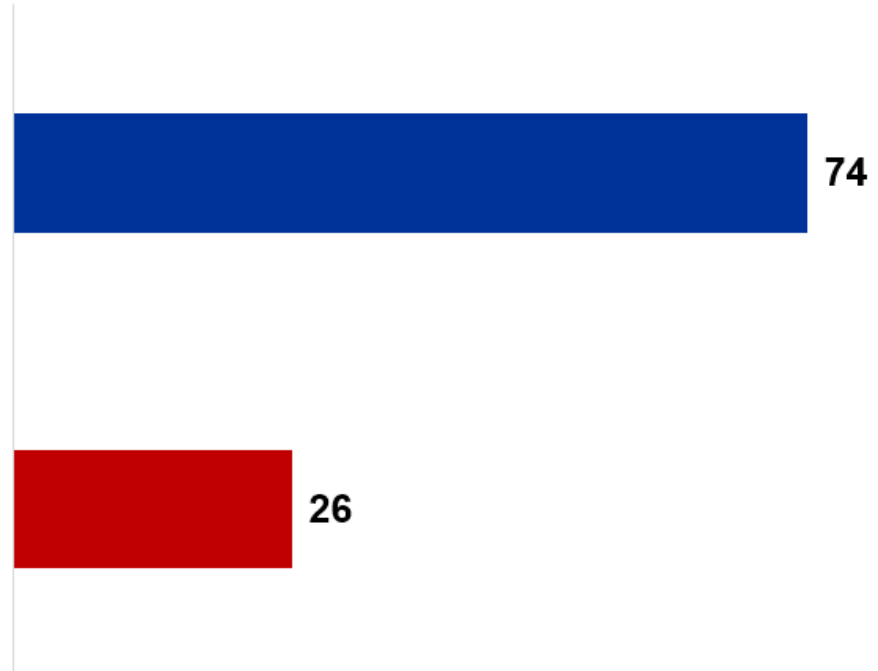

Despite Health and Economic Woes, Support for Stay-at-Home Precautions Remains Strong in Colorado

(Which statement do you agree with most?)

15

We are all in this together and need to do whatever we can to prevent the spread of coronavirus. Even if it means a few more weeks of staying at home, and missing work and/or school – that is a small price to pay in order to save millions of Americans from serious illness or death due to the corona virus.

America needs to get back to work now. This has gone on too long; people are losing jobs and the economy is falling apart. It is a sad fact that some people will get sick and die when we all go back to our normal lives, but Americans need to get back to work so that the economy recovers and people keep their jobs.

State Re-Open Decisions Should be Based on Expert Advice, Not Trump Recommendations

(Which statement do you agree with most?)

16

Latinos in Colorado overwhelmingly (81%) prefer that their governor rely upon advice from health experts when he makes decisions about how to re-open state businesses and public agencies, and spaces.

Governors should move quickly to re-open businesses in their states, based on recommendations by President Trump to get people back to work, even if some health experts recommend against that

Governors should re-open businesses on a schedule that works for their state to get people back to work, using a gradual phased-in approach based on the advice of scientists and health experts
