About the poll: On behalf of Somos and UnidosUS, Latino Decisions interviewed n=1,842 Latino adults nationwide from August 7 – 15, 2020. Respondents answered questions on their cell phone or landline with live callers, or via online self-responses through text or email invitations. Respondents were all randomly selected and lists deduped so each respondent only had one opportunity to be included. The invitation and survey were both available in English or Spanish, and overall, 36% of respondents answered in Spanish. Final data were compared to the Census ACS most recent estimates for Latino adults nationwide and weights were included to balance demographics for age, gender, education and region. Overall, the full sample contains a margin of error of +/- 2.3%. Some questions were just asked of registered voters (n=1,488) which contains margin of error of +/- 2.5%. State oversamples averaged approximately 240 respondents and have a margin of error of +/- 6.3%.
